

Evidence Readiness Report

Account: Gallery Validation Portfolio Ltd | **CRN:** GAL-001
Scope: property (Property: prop_1)
Export grade: Client presentation
Generated (UTC): 30 June 2026 at 12:00 UTC

Export grade: Client presentation

LIVE-GENERATED EXPORT — READ BEFORE RELYING ON THIS FILE

This export reflects the latest portfolio information and may differ from previous downloads.
This document reflects portfolio state at generation time and may differ from future downloads or from the live client portal.
Generated (UTC): 30 June 2026 at 12:00 UTC

Accessibility-enhanced PDF: logical section headings, improved table contrast, and selectable text. Not PDF/UA certified.

Executive Summary

Snapshot generated at 30 June 2026 at 12:00 UTC
This export reflects the latest portfolio information and may differ from previous downloads.

Score: 88/100 | **Risk level:** Low
Score status: Score may be out of date | **Last score calculation:** —
Headline note: One or more scored properties have a compliance score older than 90 days; refresh is recommended.

Counts: 1 property; 1 requirements. Evidence in place: **1** | Expiring soon: **0** | Expired/overdue: **0** | Missing evidence: **0**

Operational audit-readiness export for triage and remediation sequencing. Snapshot and export notices appear in the page footer.

Intended use

Intended for identifying evidence gaps, expiry risk, delivery proof exposure, and action priorities ahead of audit or regulatory review.
This report does not constitute legal advice. Evidence and compliance conclusions remain subject to independent verification of source documents, issuing authorities, and applicable external registries.

How to read this report

What this report shows at the report date — and what it does not decide.

- This report shows how ready your evidence is for audit review and where gaps remain.
- Audit-ready means evidence is largely complete with few critical gaps. It does not mean an external auditor or council has approved your portfolio.
- Evidence completeness shows files on file — not the same as verified compliance.
- Remediation focus here differs from the Compliance Summary portfolio overview and from the point-in-time Audit Evidence Pack.

Audit readiness indicators

Evidence completeness and audit preparation as of the report date.

Indicator	Value	Operational interpretation
Evidence completeness	0%	0 of 1 obligations have evidence on file.
Delivery proof coverage	N/A	No delivery proof records in scope.
Audit readiness posture	Substantially ready — limited exceptions	Confidence level: Medium
Priority exposure	0	Obligations flagged critical or high for remediation sequencing.

0 of 1 obligations have evidence on file.
1 obligation(s) may still require upload, onboarding, or verification before audit review.
Limited exceptions remain; address priority items to improve audit confidence.

Recommended remediation actions

Prioritised operational steps for audit preparation. Not legal advice — verify requirements independently.

No immediate remediation sequence indicated from export-scope metrics.

Operational evidence matrix

Core obligation view for rapid triage — status, evidence, expiry, and required action. Detailed references appear in the metadata appendix when present.

Obligation	Status	Evidence	Expiry	Risk	Action required
Energy Performance Certificate	Compliant	No	2027-01-15	Low	No

Reference metadata appendix

Secondary fields for audit preparation cross-check.

Obligation	Category	File ref	Delivery	Updated
Energy Performance Certificate	epc	—	No	—

Evidence exception summary

Summarised exceptions affecting evidential confidence within export scope.

Exception type	Count	Examples
Missing evidence	0	None in scope
Unverifiable evidence	0	None in scope
Expired evidence	0	None in scope
Conflicting records	0	None in scope
Missing delivery proof	0	None in scope
Unresolved obligations	0	None in scope

Action priority summary

Grouped obligations by urgency for internal review sequencing.

Informational

- Energy Performance Certificate

Jurisdiction scope

This portfolio includes assets framed for Scotland compliance context. Your account default is scotland; each property’s record takes precedence where set. Requirements that are deliberately shared across UK nations are scored the same; where rules differ by nation (for example selective licensing), only the configured rule set applies. Not legal advice.

Scoring methodology summary

Scores are evidence-based; status (Evidence in place, Expiring soon, Expired/overdue, Missing evidence) maps to a factor. Expiring-soon uses the jurisdiction- and requirement-aware rule window used in scoring. Risk level is derived from score. This is not a legal compliance opinion.
