This report is a point-in-time operational intelligence snapshot. Figures reflect data held at generation; re-download of a stored artifact returns the same bytes.

How to read this report

What this report shows at the report date — and what it does not decide.

- Month-on-month changes are directional indicators only — not a full obligation list.
- A stable or improving trend does not remove overdue items or missing evidence in operational reports.
- Digest summaries show month-on-month movement — they do not replace the Requirements Report or Audit Evidence Pack.

Score reflects selected property subset when applicable.

Jurisdiction context: Wales portfolio obligations and licensing context.

Default jurisdiction: Default jurisdiction applied where property jurisdiction unknown.

Operational follow-up (applicability)

Summary: Operational follow-up summary for applicability.

Framing notice for operational follow-up applicability.

Method and limitations

This digest is an operational intelligence briefing — not legal advice, not an audit evidence pack, and not a complete requirement register. Figures reflect tracked obligations and evidence states held in Compliance Vault Pro at generation time.

Estimated vs verified dates: Estimated dates are derived from renewal rules until verified evidence is on file. Uploading and verifying evidence improves accuracy.
