How to read this report

What this report shows at the report date — and what it does not decide.

- This report prioritises what needs action — overdue items, renewals, evidence review, and recorded items.
- Uploaded or recorded items are not the same as independently verified evidence unless stated.
- Use this report for day-to-day actions. Compliance Summary shows portfolio overview; Audit Evidence Pack holds your formal evidence export.

Immediate attention

Obligations needing prompt action — missing evidence, overdue items, or operational blockers. Address these first to reduce exposure.
