How to read this report

What this report shows at the report date — and what it does not decide.

- This report prioritises what needs action — overdue items, renewals, evidence review, and recorded items.
- Uploaded or recorded items are not the same as independently verified evidence unless stated.
- Use this report for day-to-day actions. Compliance Summary shows portfolio overview; Audit Evidence Pack holds your formal evidence export.

Triage at a glance

Immediate: **0** | Renewals: **0** | Evidence review: **0** | Recorded (unverified): **0** | Verified or accepted: **15** | Monitoring: **0**

Operational obligation management export — prioritised for remediation sequencing, not registry completeness.

Immediate attention

Obligations needing prompt action — missing evidence, overdue items, or operational blockers. Address these first to reduce exposure.

None in this report.

Recorded but not independently verified

Recorded on file without independent verification. Not failed — lower evidential confidence. Review may still be recommended before relying on these records externally.

None in this report.

Verified or accepted obligations

Accepted in Compliance Vault Pro at report time. No immediate action unless a renewal applies.

- 15 fire safety obligations across 15 properties are verified or accepted at report time.
